VIOLENCE AND ME

Human rights describe equal rights and freedom to everyone, regardless race, colour, place of birth etc. People of various sections stay together. As decided by U.N declaration of Human Rights 'All the people are given equal rights'. So, if we are getting all these rights than we have to follow it and we don't have to do such act that result into non-violence.

Economic violence

Economic violence is rising consistently. The prices of all the products as is increasing day by day. The prices which are just needed which are basic in our life are also increasing. So, it becomes difficult for poor to survive. It becomes differ difficult for

for them to live. They don't have roof on their top. So, they have to migrate in cities and villages. It is not fixed that whether they are going to get food for that day or not. Even sometimes they have to sleep with empty stomach. Their job is not fixed. They just decide it the next morning whether they will get any work for that day or not. As they are poor they do not get food to eat, they do not get any job. But the one who is rich can get the job easily. This again results into corruption, Black money. So, we should try to make attempts to stop this and spread the message of equality and humanism.

Racial violence

Racial violence is an evil custom. It decreases the feeling of oneness, humanity and equality. The one on whom this violence is being committed they feel different by ordinary people. Racial violence is committed on the people whose skin is black, who is fat and who is short highted. Mostly it is committed on black people. When Gandhiji went to South Africa he also became the victim of racial discrimination. The Whites or Britishers consider Indians as coolies and they treat them as their servant. In India some evil customs are still prevalent. Like untouchability.

such
The people don't used to consider poorers as equal to them. Those people were the people who belonged to scheduled class or backward class. If they had touched them then they used to take bath. They don't use to treat them equal. They didn't took them in any of their work. Leaders like Gandhiji and other prominent leaders at their time had done a lot's of effort to remove it out of our culture.

Religious violence

In India people of different religions, languages and culture stay together. Here, the state does not have any religion of its own and it gives political equality to all the religions. So, it cannot interfere in any religious matter and it could not be biased to any religion. Here especially discrimination between Hindus and Muslims is done. Because when India was under Britishers rule the Britishers made a wall between them. So, till today the entire country is facing religious problem. The one who Hindu is not allowed to go in another temple or the other religious people cannot come at Hindu's Temple. Here discrimination of various languages was also done. So, the carry on with equality we should stop these fake discriminations.

Physical violence

Physical violence is the most dangerous one. Here beating, terrorism are included in it. Like if Boss is angry he will reveal it on their employee and the man will beat her wife while going home. Here mostly the women's become the victim. The husbands coming at home drinking and beating their wife is a cruel practice. They just don't own money and their wives work for them and they just waste it in drinking alcohol etc.

It also includes terrorism. Various innocent people become victims of terrorism. Because of this it directly affects the person. The person stop coming in contact with other so they feel alone and it results into suicide. So, we should try to stop it by making friendly relations with other countries.

Psychological violence

Psychological violence affects mentally and emotionally. When we go for a job interview and we fail it directly affects our brain though we were not prepared for it. Similarly, at school when both the students have done well and the teacher gives more importance to one child

than it directly affects the mind of other student. And sometimes this also results into suicide. So, we should immediately stop committing this violence.

Moral violence

Moral violence means when we see something and don't speak. For example if any sort of rape happens or eve teasing happens than we just stand and see instead of helping them. Similarly when any accident happens we just stand and look we have the time to make a video of it but we have courage to save that man by sending them to the hospital. But if there is some fight somewhere than we will immediately reach there with troops and will start fighting with them without knowing the grass root and instead of helping them.

These are really common things in India so we should try to remove it.

Save our culture, and save the life, and save the girl child.

Internal violence

Internal violence means internal conflict. For example when Boss is angry he will emit his anger on his employee the employee at home as a husband will emit it on the wife and the wife on his child. Means the one who is standing on high post will emit it on the lower one. But where will the child go. So, in this it harms the child badly. Similarly many countries also have internal conflicts. Many families have and even the big ministers are also in conflict among each other.

From these we come to know that these violences harms us and also our culture. We are the only one to commits it and sends it on them only. Means we can say Apne Pairo Par Kulhadi Marana. So for our benefit only we should stop it for other and maintaining equality we should stop it.

No matter our job, no matter our height, we all deserve to be treated right.

We all are brothers and sisters so do good to others.
