SAY **YES** TO PEACE & NON-VIOLENCE SAY **NO** TO WAR & WEAPONS

One of the biggest curses of our time is the excessive diversion of resources of humanity on wars and weapons.

The total amount spent globally is shocking nearing USD 2 trillion. It means that even if 10% is reduced; people across the world would get free food and if 30% is reduced all can get free health and education.

That is not all. The misery imposed is heart-breaking. As per Amnesty international, in a typical year armed conflicts killed more than a hundred thousand people; countless survivors maimed, tortured, raped, or seriously abused and displaced over 65 million people around the world.

- Saving water and saving climate is not enough! We need to save our planet from wars and weapons
- Few companies and few countries profit with weapons at the cost of the rest and more so poor countries
- It is wrong propaganda that human nature is to fight but the real human nature is to protect
- We study history for wars, but we also study it for arts, culture and scientific development
- Survival of fittest is the rule of the jungle. Human development shows the role of dialogue and reconciliation
- It sounds enormous task today. But all big movement had a small beginning

Already the ball is rolling....

The first World March for Peace and Non-violence started from 2nd October 2009 from New Zealand. Passing through 90 countries it ended on 2nd January 2010 in Argentina. At that time in Berlin, Peace Nobel Laureates signed a declaration of Peace and World without Wars.

The second World March is starting from Madrid, Spain on 2nd October 2019. Join the movement.

Discuss your perspective on the topic with your family and friends. After enriching your views with these discussions, present the same in whatever form of talent that you are good at and send your entry for competition.
